

Nordic
Developer Conference
2008

24. October 2008
Stockholm

Invitation

The word "UNIFY" is rendered in large, dark purple, 3D block letters on a reflective floor. The letters are spaced out and cast soft shadows on the surface below them. The background of this section is a light purple gradient with faint, curved lines.

Welcome

Dear Valued Customers and Partners,

We are pleased to invite you to join us in Stockholm, Sweden this year for a great day of education and networking with Unify customers and partners from throughout Scandinavia, 24. October 2008.

Last year marked the beginning of a new journey together as a united force in the application modernization business. We renewed our legacy and recaptured our advantage as we launched new product releases that delivered new features key to your success. This year, we aim to raise the bar even higher!

The theme of the 2008 Developer's Conference is "Leverage Your Investment," reminding customers and partners that Unify is committed to helping you focus on your business and optimize your company's assets. Your success is our success!

We have developed an ambitious agenda this year, featuring:

- New product releases for SQLBase and Team Developer
- Easy end-user reporting is back with "Q"
- Customer success story session to show an easy Team Developer 5.1 migration

We sincerely hope that you will join us in making DevCon 2008 a success. We look forward to welcoming you to Stockholm.

Sincerely,

Todd Wille
President and CEO
Unify Corporation

Overview

This year's Conference is about you: Our customers. Our community. Our partners. In each track, you'll hear about technology, new releases that make your life easier and you'll hear about customers and how they use today's technology.

If you're already using Unify products, check out the demonstrations of how you can extend the power of what you already have and how you can leverage your existing investment. If you're interested in a deep dive and hands on experience, you'll have the chance to check with our Unify experts.

We created the Conference as a forum for innovations and trends in technology, and it has proven to be a great event for customers looking to advance their investments in Unify products. Developers, engineers, architects, business decision-makers - at the conference, they come together.

Join them!

Leverage your investment

UNIFY

European
Developer Conference
2008

Radical changes in the business world over the last decade, especially the myriad of new technology and enterprise options, has created major challenges to the world of Information Technology.

Whilst organisations have had to adapt and embrace to the new demands of things such as e-commerce and distributed technology models, it is not uncommon to find that many organizations core IT platforms and solutions are still based on 1980s and early 1990 technologies. This very often leads to issues regarding the integration of legacy systems, the associated high cost of operation and maintenance, no longer supported operating systems and delays in application modernization.

That's when the concept of legacy software modernization emerges as the most viable and cost-effective path to preserve the business knowledge present in these assets and enhance their functionality, avoiding the technological obsolescence dead-end trap. But in today's fast-evolving, highly competitive markets, the alternative is only to adapt to state-of-the-art software and not to drop behind and go out of business. So this might be a good time to assess your investment in legacy applications.

So to succeed in today's environment, corporations must seek the most cost-efficient operations and the maximum agility of their businesses. That is what we describe as "leverage your investment". Unify has aligned its strategy and product portfolio to address many of these issues and to help provide you with clear answers and solutions to your business requirements, including:

- How to leverage the investment in up to 10 to 15 man-years investment in the development of your business applications with SQLWindows and/or Team Developer to become up-to-date with your application again.
- Do you still have old 16-bit SQLWindows applications in your company that need to be modernized? We show you live how these can have an up-to-date look & feel without new development or re-write.
- Have you started with SQLBase Desktop or 5-concurrent users and now need to scale up with higher performance? We show you how multiprocessing support in SQLBase works today.
- Did you wish for a modern administration tool in SQLBase? Here it is: the new and modern looking Command Center.
- Are you aware, how easy it is to turn your SQLBase database into a high-secure database?
- Brand new: easy end-user reporting is back with "Q"!

Session Contents

UNIFY

European
Developer Conference
2008

Leverage your investment: Team Developer 5.2

All the exciting new features of Team Developer 5.2 are covered in this session. We demonstrate all enhancements to the user interface for the developer, to the latest GUI additions that allow creating incredible rich applications that your users will love to use.

Modernize your application:

Get the latest look & feel for your Team Developer application

We will show you how to bring the look & feel of your applications to latest user interface standards, with various themes such as Office 2007 and Windows XP with Team Developer 5.2. This session will highlight the efforts necessary when migrating existing applications to Team Developer 5.2, including Unicode and Windows API hints.

Leverage the enhanced visual capabilities:

The new data grid in Team Developer

Enhance the visual attractiveness of your Team Developer applications. Use the new Team Developer 5.2 data grid to visually display and print data.

End-user query and data management is back: "Q"

Queries, reporting and data management is back in one easy to use end-user oriented tool. Learn how you can create powerful data analysis queries, build reports and import, export data with ease.

Case Study: Leverage your investment with Team Developer

See how customers are using Team Developer 5.x to modernize their applications.

SQLBase 11.5 - what's new

SQLBase 11.5 introduces a wealth of new features and benefits, like multi-processor support, Unicode and much more. This session gives an in depth view in all new features of SQLBase 11.5.

Boost your database performance to the maximum/ultimate speed: Multiprocessing support in SQLBase 11.5

Learn how to scale SQLBase for higher throughput and for more concurrent users while reducing contention. See performance comparison with previous releases and learn how to take advantage of the new functionality to maximize your performance.

New integrated one-click administration:

New command center in SQLBase 11.5

SQLBase Command Center integrates all SQLBase administration tasks into a new easy to use modern looking tool. This session gives an in depth view of SQLBase Command Center including tasks like database object creation, scheduling automated maintenance and backups and a lot more.

Moving SQLBase International to SQLBase 11.5

Listen to this session if you are currently using SQLBase International and you want to upgrade to SQLBase 11.5 to leverage the new performance and database administration features.

Unicode in SQLBase 11.5

New SQLBase 11.5 brings full Unicode support for those that need it, without impacting users that do not need Unicode. This session covers the details of SQLBase 11.5 Unicode and how to make the best use of it.

UNIFY

Location

PRIME POINT CONFERENCE CENTRE AT ARLANDA AIRPORT

Prime Point at Arlanda Airport is a central and geographical good location for our Developers Day no matter where you are coming from in Northern Europe. The conference centre is in walking distance to flights, trains and buses between terminal 4 and 5. The train station is downstairs and the bus stop right outside.

If you need accommodation the closest hotel in the same building is the Radisson SkyCity Hotel.

Prime Point
SkyCity at Arlanda Airport
SE - 190 45 Stockholm-Arlanda
